

Taxation

Spring 2021

Professor Abrams

All assignments are to the materials distributed via Canvas entitled “Federal Income Taxation: A Systemic Approach,” by Howard E. Abrams (spring 2021 edition) (“the Book”). We will cover two assignments per class session, 24 sessions in all. You will need to bring the relevant portions of the Book to class as well as a 2018 or later copy of the Internal Revenue Code and Income Tax Regulations (selected provisions). The Code and Regs. are available as a single volume at the campus bookstore as well as through on-line sellers. There are freely available versions of the Code and Regulations accessible through a web browser, but you will find such access too cumbersome. There is an excellent paid app available for both Android and iOS called TouchTax.

1. Introduction and the Tax Legislative Process: Wikipedia article on reconciliation; pp. 1-3.
2. Tax Base: 3 – 8.
3. Computation of Gain and Loss: 9 – 12.
